

Step 1: enter the directory u want to enter and write react-native start!

```
C:\Users\Resham>cd Desktop
C:\Users\Resham\Desktop>react-native init Awes
This will walk you through creating a new React Native project in C:\Users\Resham\Desktop\Awes
Using yarn v1.19.1
Installing react-native...
yarn add v1.19.1
info No lockfile found.
1/4] Resolving packages...
Warning react-native > create-react-class > fbjs > core-js@1.2.7: core-js@<2.6.8 is no longer maintained
to core-js@3 or at least to actual version of core-js@2.

```

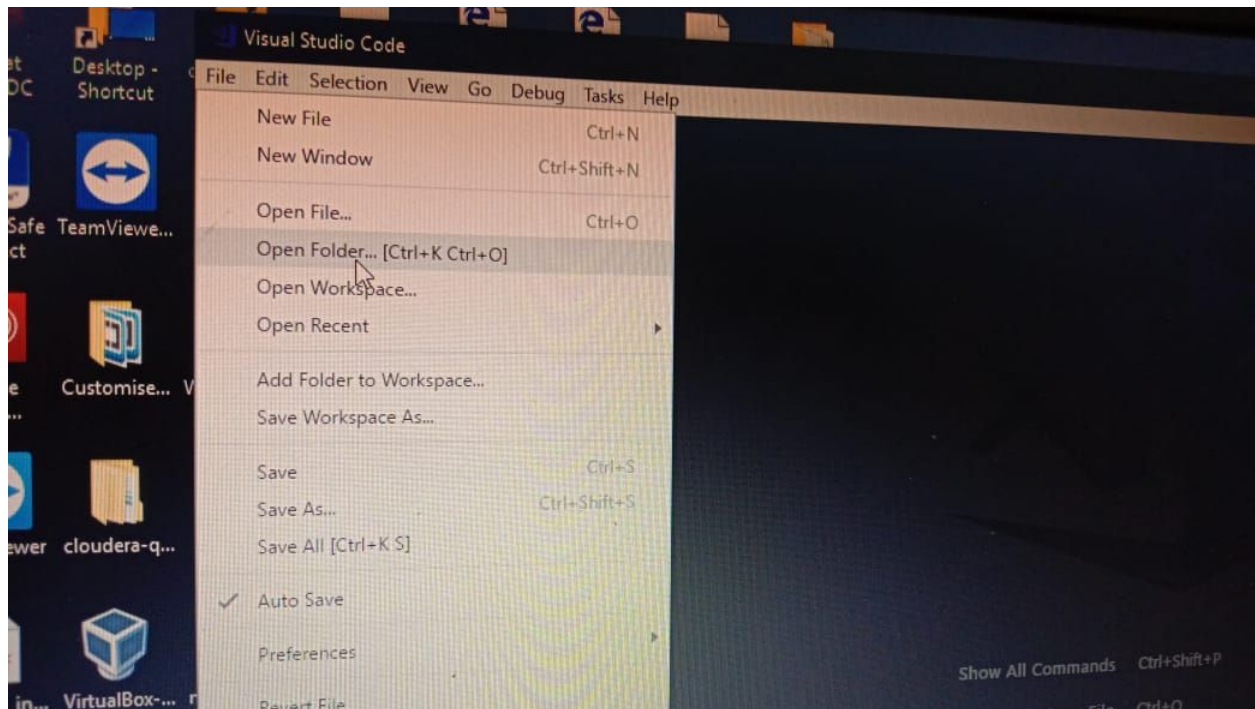

Step 2: Awes folder desktop p ban gaya hoga check karna

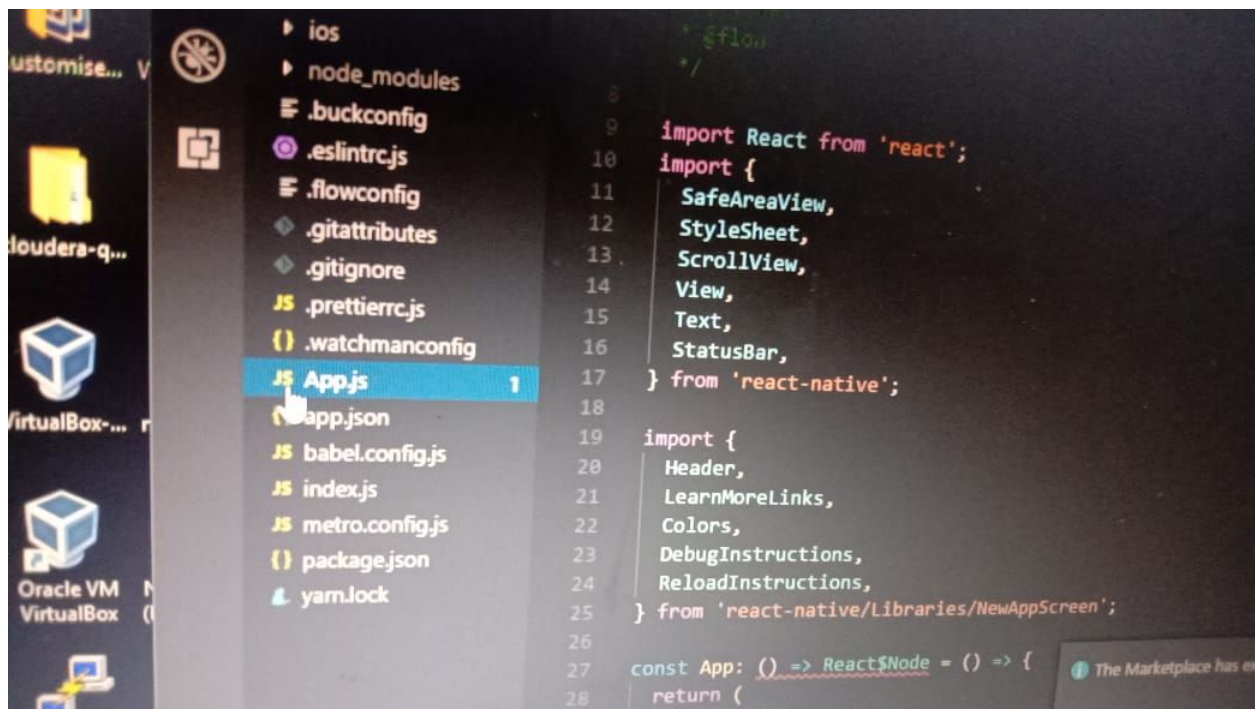

Step 3: Check for this files in Awes folder..will appear like this

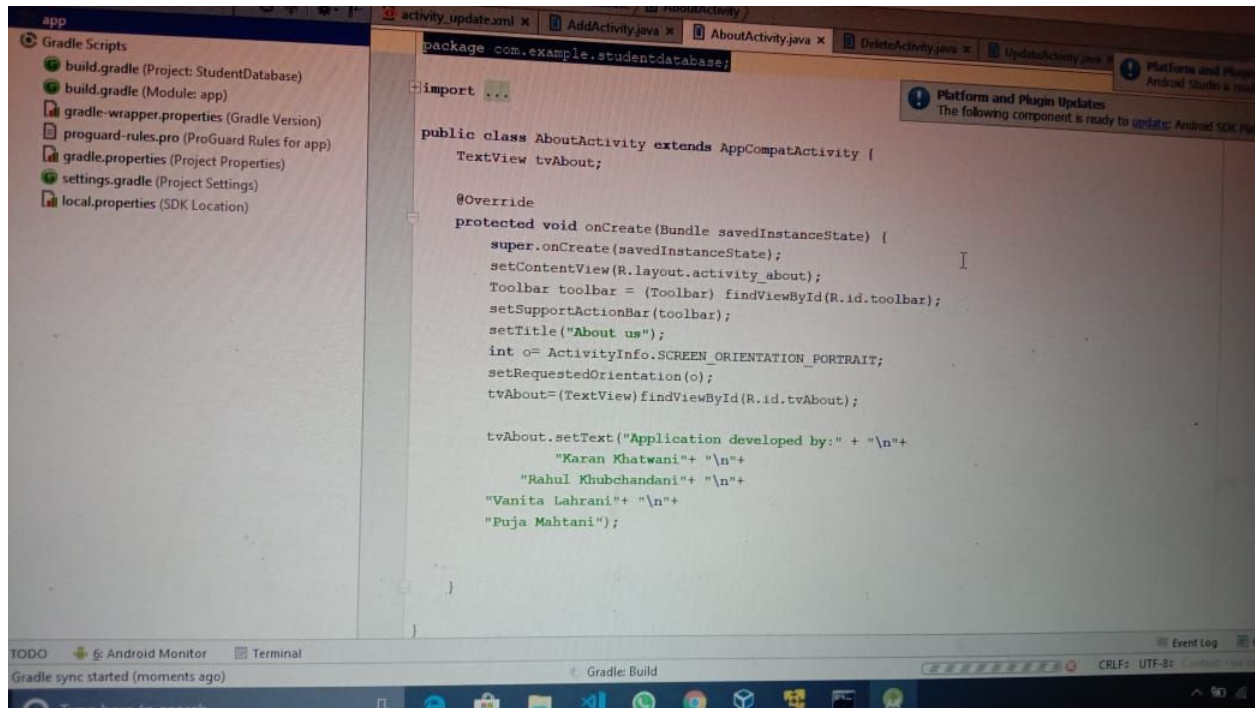

Step 4: open Awes folder

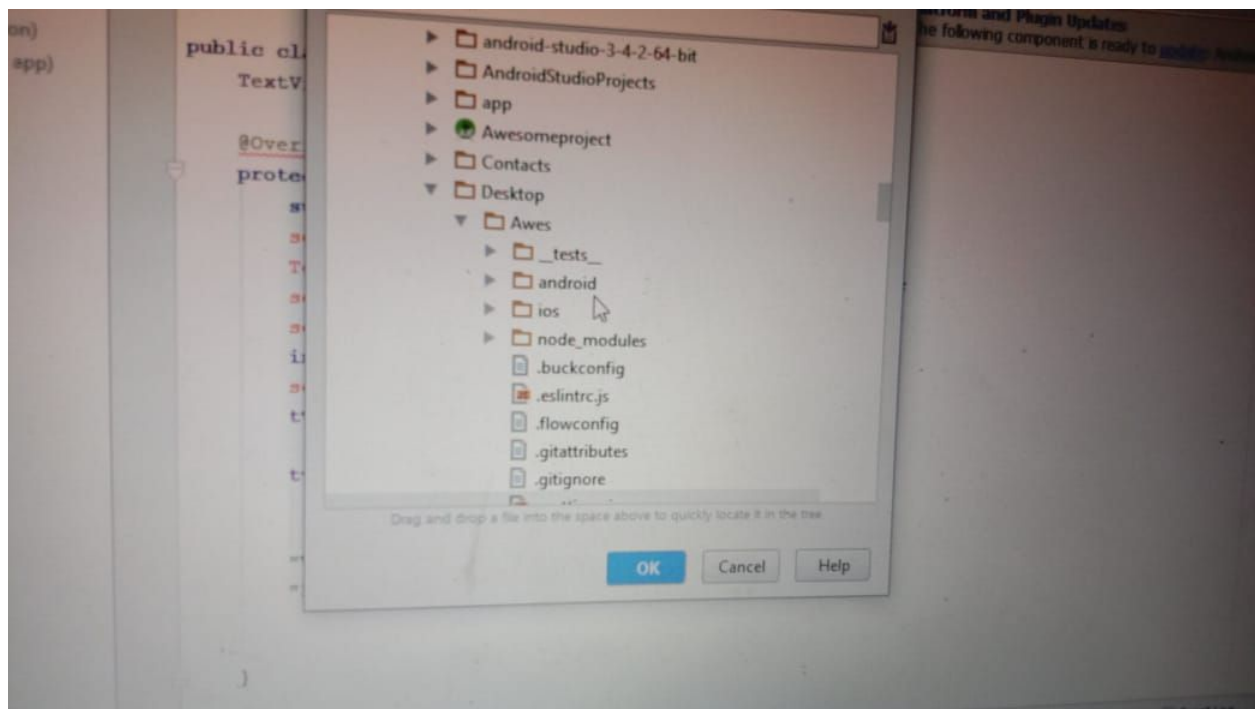

Step 5: write your app.js file

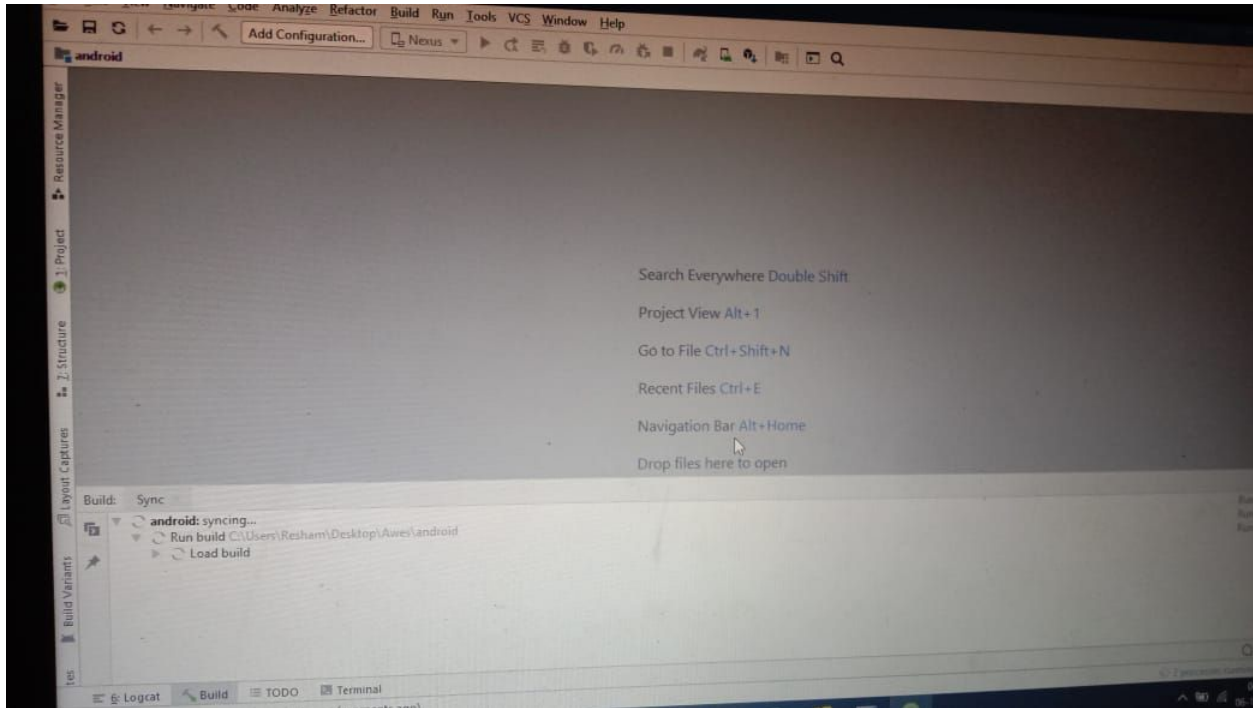

Step 6: Open Android Studio

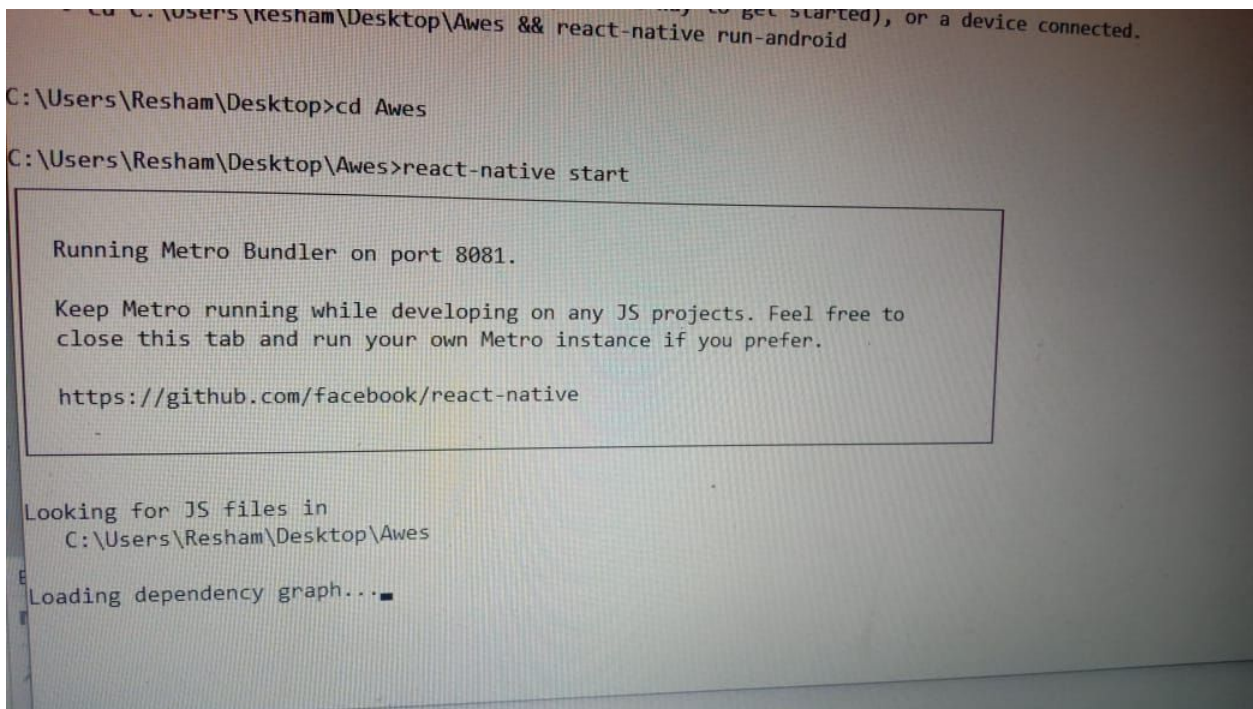

Step 7: Open android folder existing in Awes folder inside Android studio

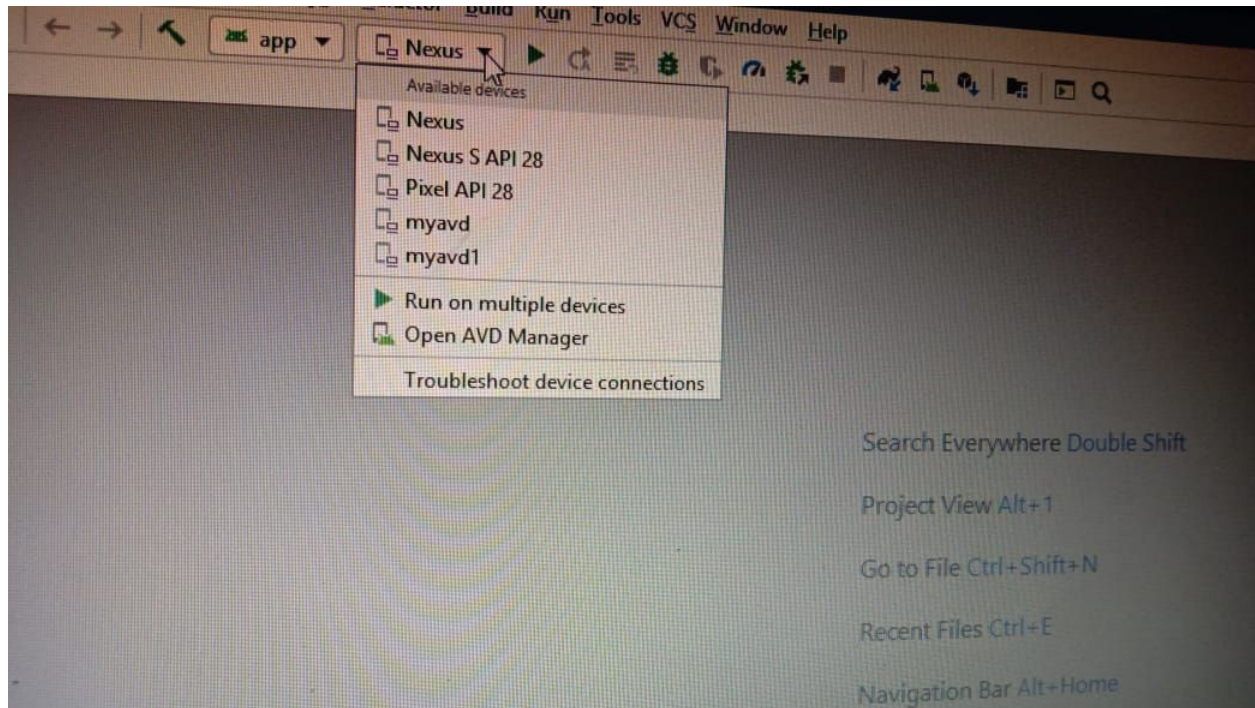

Step 8: just see if gradle is successfully built

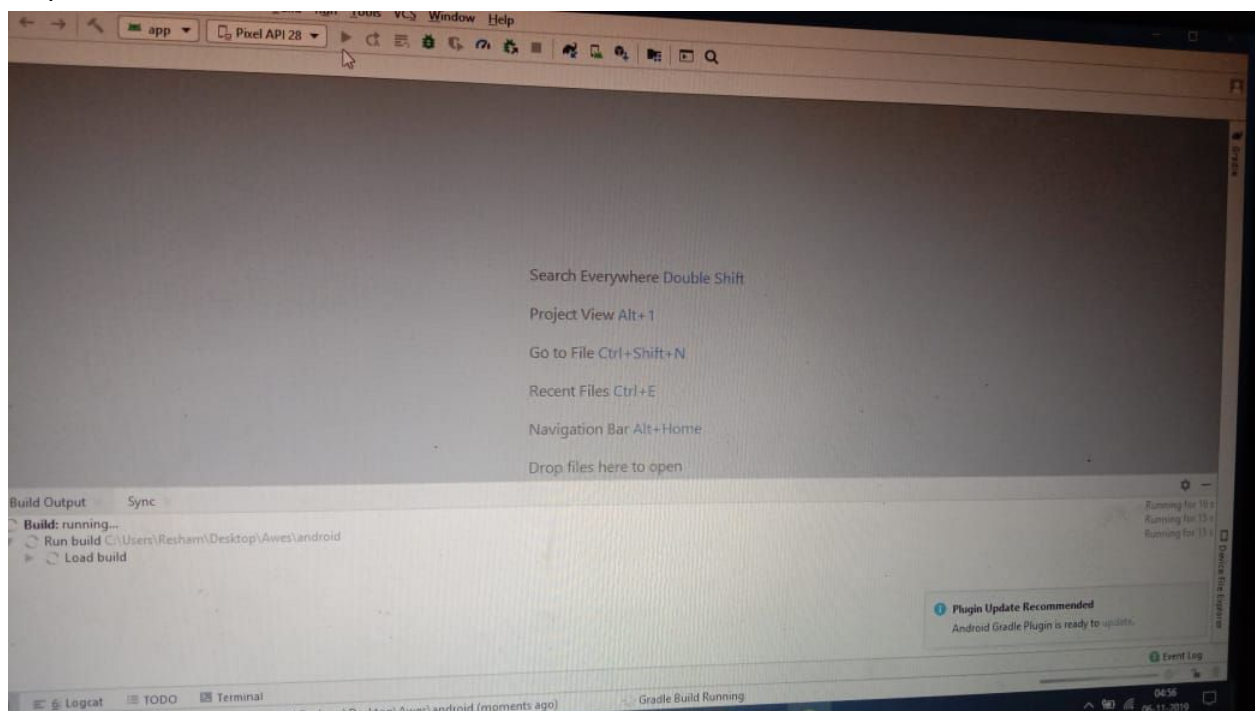

Step 9: Enter the Awes folder and write the command "react-native start"

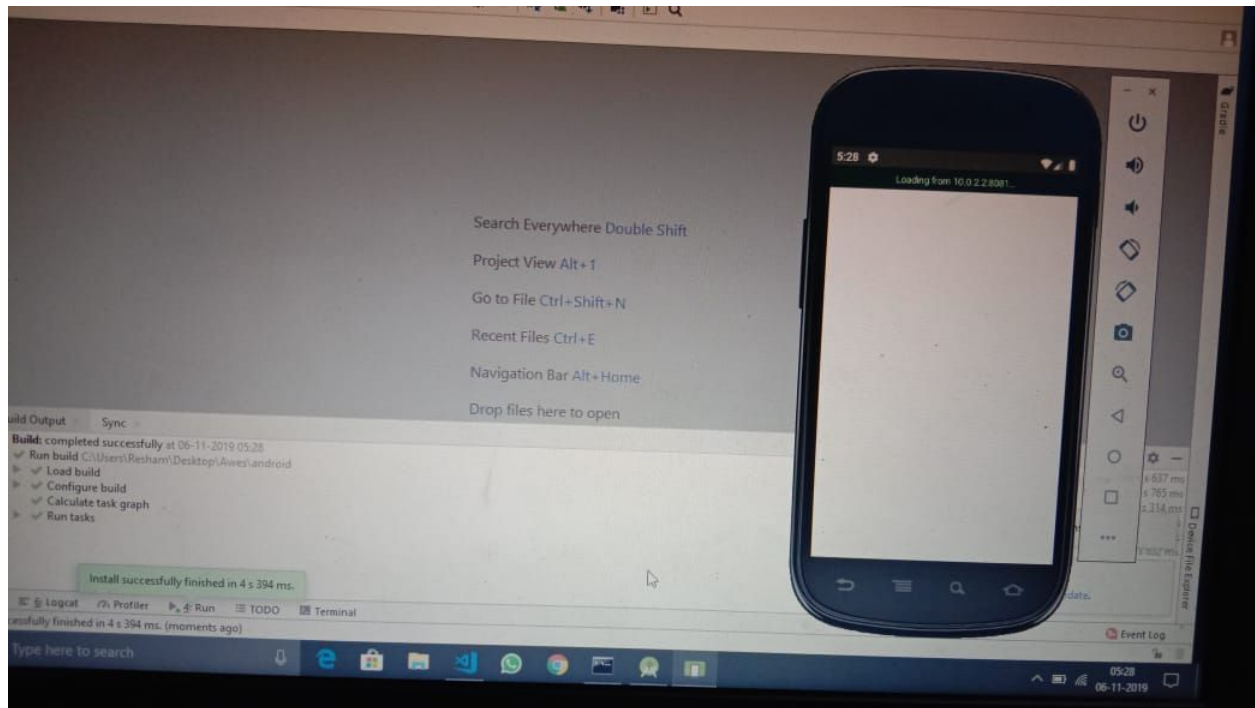

Step 10: Again enter the android studio and select the emulator

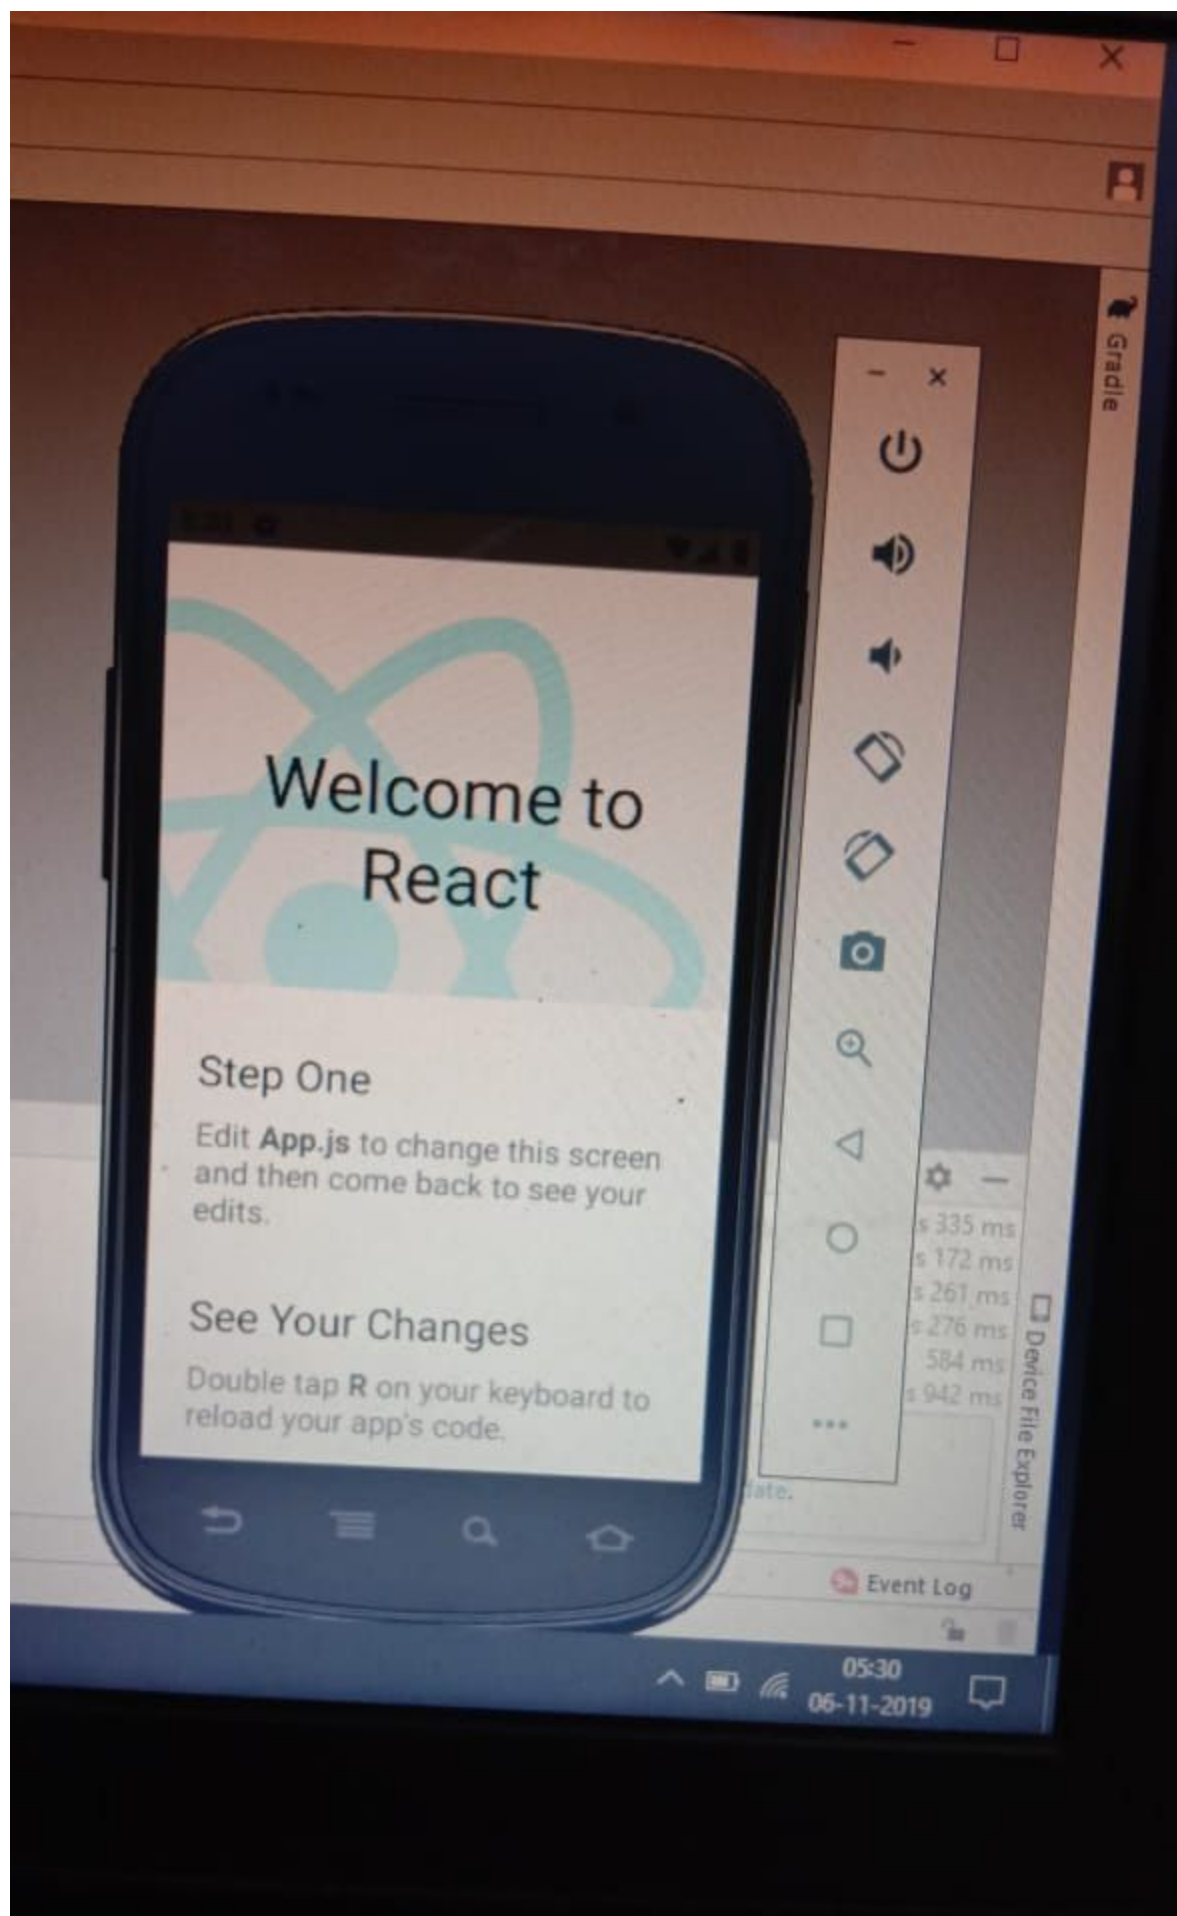

Step 11: Emulator will take a few minutes to launch

Step 12: Emulator will appear with output

As I have no code in.. App.js file.. It will appear in this way..♥

Welcome to React

Step One

Edit **App.js** to change this screen and then come back to see your edits.

See Your Changes

Double tap **R** on your keyboard to reload your app's code.
